Friday, May 17, 2013 - 14:15

Discussion:

Even though IFLOODS is called down from 7 PM Friday to 7 PM Saturday (18 May), we will plan to hold a conference call on Saturday at the normal 9 AM time. We want to hear the latest forecast guidance for the Sunday-Tuesday timeframe, when we expect significant weather. N-pol continues to scan weak cells to our west through north, the closet of which is 80 km from N-pol.
